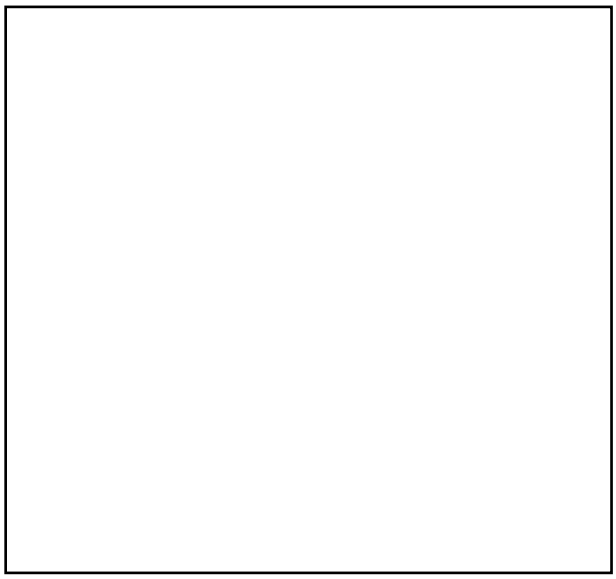
THE

SUMMARY PROCEEDINGS

3rd ANNUAL MALARIA CONTROL PROGRAM REVIEW
Ethiopia and Nigeria

Held on February 24, 2012 at
The Carter Center, Atlanta, Georgia

September 2012



In 2011, The Carter Center surpassed the milestone of helping the Nigeria and Ethiopia Ministries of Health to distribute 10 million insecticide-treated bed nets to fight malaria and lymphatic filariasis since 2004. On this pin, the hatched line pattern and the color white, which respectively symbolize "heroic efforts" and "peace" in Nigeria, represent the millions of people now able to sleep peacefully, undisturbed by biting mosquitoes that transmit these diseases.
