**De: Laura Neuman  
Chargée de Projet Accès à l'Information et Directeur Adjoint, Programme des Amériques**

nombre de pays qui ont adopté des lois très étendues en faveur du droit à l'information, il n'y a peut être pas eu assez d'attention sur comment ces lois fonctionnent dans la pratique, et jusqu'à quel degré ces lois ont été mises en œuvre, appliquées et utilisées.

Par ailleurs, nous ne savons pas clairement si les bénéficiaires du droit à l'information atteignent pleinement les personnes les plus désavantagées et créent les transformations escomptées au niveau de la société. Bien que le droit à l'information semble être un outil potentiellement puissant pour garantir les responsabilités et promouvoir le développement, il y a un besoin connu de faire des recherches rigoureuses pour démontrer son impact de manière à convaincre les gouvernements que les avantages de l'ouverture sont plus importants que ceux d'une opacité qui continuerait.

La promotion du droit à l'information a été menée par une communauté isolée qui a souvent négligé d'inviter à la discussion tous les participants clés ou d'autres domaines cruciaux, et qui n'a pas de programme commun pour l'avancement futur du droit à l'information. Nous sommes à un moment critique du développement du droit à l'information au cours duquel les changements contextuels dans le monde doivent être pris en compte.

Depuis que la vague d'activités pour promouvoir le droit à l'information en tant qu'élément essentiel de la démocratie et d'une bonne gouvernance a débuté il y a dix ans, le monde a connu un changement de paradigme. Le 11 septembre et la guerre contre le terrorisme ont été utilisés (certains diront abusés) pour limiter le droit d'accès des citoyens à des informations cruciales. Les développements technologiques se passent très rapidement et les politiques ne peuvent pas suivre. Si ces développements ne sont pas encadrés d'une manière adéquate, ils pourraient gêner plutôt que promouvoir l'accès à l'information. De plus, le pouvoir que l'état détenait à une époque est maintenant dispersé vers d'autres secteurs, y compris les entreprises multinationales et le secteur privé, les institutions financières internationales, et même les organisations de la société civile, alors que les documents que ces secteurs détiennent sont en grande partie cachés du public.

Bien qu'il y ait eu de nombreuses conférences sur le sujet de l'accès à l'information, relativement peu d'entre elles ont rassemblé des hauts fonctionnaires gouvernementaux, des experts, et d'autres participants cruciaux, tels que des représentants de la société civile, du secteur privé et des médias. La plupart des réunions dans le passé portait sur le partage d'anecdotes et d'expériences, ou d'aide technique sur des thèmes spécifiques. Nous voulons que notre conférence se concentre sur les obstacles *politiques* de la mise en œuvre des régimes du droit à l'information identifiant les coûts et les bénéfices pour chaque participant. Sous la direction du Président Carter, nous souhaitons que cette conférence débouche sur un plan d'action opérationnel qu'il soit possible de mettre en œuvre.

## **Le But et les Objectifs :**

**Le but de cette conférence internationale est l'avancement d'un droit efficace à l'information dans tout le monde.**

Les objectifs principaux de cette conférence sont les suivants :

1. Réfléchir au statut actuel du droit à l'information publique dans le monde
2. Analyser l'impacte de l'accès à l'information sur des domaines tels que le développement et la gouvernance
3. Explorer les actions prioritaires pour promouvoir l'adoption et la mise en œuvre totale de lois sur le droit à l'information en étudiant les considérations de *realpolitik* qui ont une influence sur tous les participants

Ces objectifs seront accomplis grâce à des premiers conférenciers, des présentations en panel, des groupes de travail, et des séances plénières. En rassemblant dans un cadre décontracté un groupe d'illustres penseurs, de personnes d'influences, et de personnes de terrain, nous espérons créer l'environnement adapté pour aboutir à ce but. A la fin de la conférence, les participants présenteront des recommandations en ordre de priorité et un plan d'attaque pour l'avancement du droit à l'information à travers le monde.

## **La Méthode**

En dehors de la séance d'ouverture plénière et de la conclusion le dernier jour, nos débats seront à huis clos et confidentiels pour permettre à toute personne d'exprimer ses opinions et ses pensées en toute confiance. Il n'y aura pas de discours ou de procédure formelle. Les personnes qui présenteront au cours des déjeuners, des dîners et de la séance d'ouverture plénière de mercredi après-midi apporteront le contexte pour les débats à travers de très courtes présentations destinées à lancer des débats de fond. Au cours de la séance de conclusion, nous confirmerons le résumé ou la déclaration de la conférence.

Jeudi, nous nous séparerons en cinq groupes de travail pour analyser des questions spécifiques identifiées au cours d'une réunion préparatoire qui a eu lieu en mai 2007 et/ou soulevées par certains d'entre vous au cours de longues concertations. L'objectif de chaque groupe de travail est de proposer des recommandations pour passer à l'action. Nous vous demandons de réfléchir aux actions en pensant aux divers acteurs. Que peut apporter chaque acteur – acteur de la société civile, de gouvernements nationaux, d'organisations internationales, du secteur privé, des médias, des académiciens, d'institutions financières internationales, et d'organisations donatrices ? Tout le monde est égal dans ces petits groupes puisque nous avons certains des meilleurs et des plus dévoués experts et hommes de terrain dans le domaine du droit à l'information. Vos facilitateurs et rapporteurs sont les meilleurs dans le domaine et ils nous aideront à avancer pour développer des recommandations claires.
